

Project Overview

This project aims to analyze topics discussed in the Reddit community **r/disability**. Using topic modeling, the project will uncover areas of concern and interest within this digital disability discourse.

Objectives

- Using BERTopic to perform topic modeling on a dataset of Reddit posts.
- Identify and describe discussion topics within the r/disability community.
- Explore how topic categories relate to post engagement (upvotes/comments).

Methodology

- **Data Collection:** Collect 1000–3000 posts from r/disability.
- **Preprocessing**
- **Topic Modeling:** BERTopic to extract latent topics and associated keywords.
- **Analysis:** Description/labeling of topics, analysis of engagement with topics.

Expected Outcomes

- A list of key topics with representative keywords and post examples.
- Visualizations of topic frequency and structure.
- A written interpretation of the findings.
- Github repository containing the source code.
